Pastor Evangelist: Alfred Siple

10:30 a.m., Sunday school.

11:30 a.m., Morning service.

We preach the Victory life of

Christ, and invite you.

CARD OF APPRECIATION

Blairmore, Alberta,
January 31st, 1946.

Editor Blairmore Enterprise,

Blairmore, Alberta:

Will you please accept as the pri-
vilege through the columns of your
paper to express our sincere thanks
to all those who so ably assisted in
fighting the fire at our Bellevue split-
up on Saturday evening, January 26th.

Especially do we thank the Blair-
more fire department, also those of
our employees, and citizens of the
Town of Bellevue, who, by excellent
work under very difficult conditions,
averted a near tragedy to the life of
the community which depends on the
production of coal for its livelihood.

We appreciate the evidence of such
splendid community spirit.

M. H. CONGDON,

Bellevue Mine Manager,

West Canadian Collieries, Ltd.

"V"

The bodies of the seven airmen killed
in a crash in the mountains south-
west of Blairmore on January 19th,
have been shipped to Vancouver for
burial. Their plane was on a flight
from Comox, BC, to Winnipeg.

IT REALLY IS SMART TO

serve Maxwell House. This

famous blend of coffee

has extra fragrance and

flavor — extra smooth,

full body. It's always

"Good to the Last Drop!"

ANNUAL CONGREGATIONAL MEETING UNITED CHURCH

Splendid progress was evident from
the various reports submitted at the
annual meeting of Blairmore United
church, held in the church auditorium
on Monday evening last, January 28th,
and the attendance of numerous mem-
bers and adherents of the church was
indicative of the growing interest in
every branch of the work of the church.

The activities of the various groups
and the financial standing of all
branches reveal a very healthy con-
dition.

The annual meeting was opened by
the pastor, Rev. James McKelvey,
with a solemn scripture reading and
prayer. Mr. Sam McDowell officiated
as secretary.

After the minutes of the last an-
nual meeting had been adopted the
Sunday school reports were presented
by Mrs. Howe and Mrs. Murray.
These reports showed that the average
attendance had now reached 100 and
that several special days had been held
during the year for the children, which
had been very interesting. An appeal
was made by the officers of the Sun-
day school for the parents to encour-
age the regular attendance of the chil-
dren at all sessions. The finances of
the Sunday school are in splendid
shape. A report covering the work of
the Golden Keys Group of Junior Ex-
plorers showed that they had also had
a very active and interesting year.

The financial report of the Ladies
Aid Society indicated that they, too,
had been very busy during the year,
and though the expenses of the work
programme for the year had been high,
the balance in the funds was quite
healthy. This report was read by
Mrs. Morgan on behalf of the Ladies
Aid secretary, Miss Oliver.

A splendid account of the actual
work of the Ladies Aid was presented
by Mrs. J. Patterson, and revealed
that in addition to the regular church
work taken care of by the ladies, they
had been particularly active in as-
sisting the local branch of the Cana-
dian Red Cross Society, and during
the year had provided a large number
of articles required by the Red Cross.

The general financial report of the
church was read by Mr. McDowell,
secretary, and revealed that the church
had enjoyed one of the most suc-
cessful years for a long time. All
accounts had been paid before the year
ended, and a substantial balance was
still on hand. The increased assess-
ment for the Missionary and Main-
tenance Fund was fully discussed by
all present. The senior, intermediate and
junior groups of the CGIT all pre-
sented reports of their activities dur-
ing the year and it was very evident
that these girls had not only enjoyed
their terms of membership in the var-
ious groups, but had found the work
to be of a very enjoyable nature. They
expressed their thanks for the work
of their leaders, and hoped to extend
their programmes in the coming year.

Rev. Mr. McKelvey read the report
of the Board of Session, which shows
the present membership of the church
now stood at 94. The pastor acknowl-
edged the outstanding work of the
various branches of the church during
the year, and particularly expressed
thanks to the following for the splen-
did results obtained: the Ladies Aid
Society; the Sunday school teachers;
the leaders of the CGIT groups; the
organist, Mrs. Bowman; the secretary,
Mr. McDowell; the donors of the pulpit
flowers for Sunday evening ser-
vices; Mr. McDowell and Mr. H. Moore
for improvements to the manse; the
janitor for comfortable conditions of
the church building; and the local
press for free publicity given.

The report of the pastor was re-
ceived with very generous applause,
and a hearty vote of thanks to Mr.
McKelvey in appreciation of his good
work.

A letter of sympathy was ordered
sent to Mrs. May, and a record of the

MOUNT EISENHOWER

The renaming of Castle Mountain in
Banff National Park, Alberta, in hon-
or of General Dwight D. Eisenhower,
is a fitting tribute, not only to a great
and indomitable soldier, but to all the
people of the United States. It is also
a fine gesture of the pride and admi-
ration which Canadians have for this
great architect of victory.

In a massive and enduring monu-
ment raised high in the Canadian
Rockies his name will be forever re-
called. Millions of his fellow country-
men will yearly view this towering
alpine fortress carved out by Mother
Nature herself, complete with tur-
retes, bastions and battlements, and
standing out boldly as the chief fea-
ture of a truly remarkable alpine
landscape.

Millions of Canadians will also pass
that way as both a transcontinental
railway and the trans-Canada highway
skirt its broad base. Millions of visi-
tors from other lands where the name
of General Eisenhower is synonymous
with victory will view and admire this
everlasting monument to the man who
did so much to preserve their freedom
and national dignity and who led their
sons to final and complete victory in
Europe.

There are always legends connected
with natural phenomena such as this
lofty edifice resembling a feudal cas-
tle. One has it that this is the home
of the winds. "When there's a breeze
on Lake Louise" more often than not
it is the Wind Fairy stealing down
from her mountain fastness to admire

the reflection of her beauty in the
mirrored surface of this charming al-
pine lake. And when a breeze drifts
down across Banff National Park
through the foothills onto the open
prairie it is the same Wind Fairy
bringing warm zephyrs to Alberta's
wheat and ranch lands.

Mount Eisenhower is more than
9,000 feet above sea level and was
first climbed in 1884 by A. P. Coleman.
One of the mountain's massive
shoulders well above timberline has
been installed a fire lookout station.
From this vantage point wardens scan
the Bow Valley for 80 miles in both
directions. The lookout cabin is con-
nected by telephone with the forest
fire protection service of Banff Na-
tional Park and is accessible by trail
from the main highway.

At the foot of Mount Eisenhower a
public campground has been laid out
close to the Trans-Canada Highway.
It is equipped with two camp dining
shelters and running water. A bun-
galow camp consisting of 18 cabins
and an auto camp with nine cabins,
both under private management, have
been established near the base of
Mount Eisenhower for the convenience
of visitors to that part of Banff Na-
tional Park.

All of this accommodation is likely
to be taxed to capacity during the
1946 tourist season, particularly in
view of the renewed interest which
has been created by naming this mag-
nificent Alpine masterpiece in honor
of General Eisenhower.

came into the Blairmore employment
office with a problem on his mind.
He wanted a job, but because he had
used all his re-establishment credits
to put a roof over his family, it was
not possible for him to move
away from his home locality to some
place where he might have a better
opportunity for employment. What
could the employment office offer
him? Having ascertained that he was
entitled to reinstatement in his old
job, he was taken to his former em-
ployer. Unfortunately, every job in the
place was either too heavy or else un-
satisfactory. Every possibility was checked
and weighed with the employer, but
hope faded with every angle ap-
proached. Nothing remained but to
seek other channels.

Back at the local office, the place-
ment officer gave serious and con-
centrated study to Mr. Rees' problem.
There were no available jobs on file
at that moment which would suit a
man with two artificial legs. Undaun-
ted, the officer went through the tele-
phone book page by page in the hope
of discovering a prospective employ-
er. Suddenly, it dawned on him. The
Provincial Liquor Dealers were right
next door. Why not try them? He did,
and was successful.

Today, Mr. Rees is happily and
graciously employed. He sits at a stool
at the counter and makes out permits
and sales slips. He is warm and
comfortable, and has no standing on
walking around to do. As he himself
said, he's as "happy as a bug in a
rug."

Not so very long ago, Mr. Rees rug-

ANNUAL RATEPAYERS' MEETING

The annual meeting of ratepayers
of the Town of Blairmore and Blair-
more School District 628, held at the
central school house on Friday eve-
ning last, was attended by very few.

Various reports read were approved.
John Lloyd acted as chairman of the
town meeting, and Robert Horne the
school meeting.

Auditors' reports were submitted by
Secretary-Treasurer C. M. Larbalest-
ier.

"V" ANNUAL B.E.S.L. MEETING

The annual meeting of the Blair-
more Branch of the Canadian Legion
B.E.S.L. was held in the club room on
Sunday afternoon, attended by about
fifty members.

Reports were heard from the pres-
ident, secretary-treasurer and others
and all appeared gratifying.

Election of officers resulted as fol-
lows: President, William
Evans; secretary, J. J. Yoneta; J. R. McLeod, J. Turner
and C. C. Miller, executive.

"V" BLAIRMORE RED CROSS

Following is a statement of receipts
and disbursements of Blairmore Red
Cross branch:

Receipts: Cash on hand Dec. 31,
1944 \$173.54; membership fees \$6.00;
donations \$608.53; subscriptions
Frank Red Cross vbkqj shrdlu emf
(\$3,992.28 less \$43.00 transferred to
receipts \$4,732.35.

Disbursements: Merchandise and
supplies to Alberta Division \$213.26;
funds transferred to headquarters di-
vision \$4,432.49; supplies purchased
locally, stamps, etc., \$16.90; delegate
to Calgary \$25.00; blood donor clinic
\$14.00; cash on hand and at bank
Dec. 31, 1945, \$50.10. Total disbur-
sements \$4,732.35.

"V" ELKS INSTALL OFFICERS

At a grand rally of Elks held in
the Coleman Community hall on
Thursday evening of last week, officers
of Coleman and Blairmore lodges were
installed for the ensuing year as fol-
lows by DDGER Dan Boyle, of Mac-
leod:

Coleman—
A. Wilson, exalted ruler.
G. Jenkins, IPER.
F. Kyncl, leading knight.
S. Krayko, loyal knight.
Joe Jenkins, lecturing knight.
J. M. Rushon, secretary.
A. M. DeLuca, treasurer.

Blairmore—
A. R. Bourne, exalted ruler.
E. B. Jones, IPER.

J. L. Green, leading knight.
C. R. Coover, loyal knight.
W. H. Sandall, lecturing knight.
C. A. Freeman, treasurer.
R. C. Old, secretary.
G. Meffan, chaplain.
Sam Scott, inner guard.
J. H. Pratt, Tyler.

H. M. Dancy, esquire.
M. Van Wyk, Alex McKay and J.
McPhail, trustees.

Following the installation ceremony
the gathering were addressed by F.
N. Haney, of Calgary, grand exalted
ruler, and others.

Refreshments were served in Dutch
style by L. S. Richards, to which all
dined full justice.

About two hundred members were
in attendance, quite a number coming
up from Granum and Macleod.

In the old days you kissed a girl
instead of pressing your mouth
against a fresh slick coat of paint.

Frank Christian, aged 65, an em-
ployee of the provincial public works
department, collapsed suddenly at
Coleman and passed away on Satur-
day evening. He worked on the gov-
ernment snow plow during Saturday.
The remains were taken to Macleod
for burial. His wife survives.

HILLCREST HAPPENINGS

Bernard Massine had the misfortune
to break his leg while skating at the
rink last week. He was rushed to the
Bellevue hospital for treatment.

Mrs. F. M. Fraser, of Staveland, is
guest of her daughter and son-in-law,
Mr. and Mrs. Don Thornton.

Clifford Letcher, jr., was released
from the Bellevue hospital on Wednes-
day after undergoing a minor opera-
tion.

Mr. and Mrs. Ted Ashmore, accom-
panied by Leonard Rhodes, of Belle-
vue, and Jack Root, of Coleman, mo-
tored to Champion on Friday to spend
the week end.

Johnny Ferby is confined to bed for
about three weeks, the result of break-
ing the ligaments of his leg while
skating on Sunday night.

"V" COWLEY HAPPENINGS

A. Wende is spending a few days
in Calgary.

Pie Kathleen Elton, CWAC, returned
home Monday from service over-
seas.

Miss Lillian Porter, of Lethbridge,
spent a few days recently on a visit
to her parents, Mr. and Mrs. George
Porter.

Mrs. Maurice Lemire entertained
the ladies' bridge club at her home
on Tuesday night of this week. Prizes
were awarded to Mrs. Alvin Murphy
and Mrs. Wilfrid Fortier, first and
consolation.

Local mothers brought a goodly
number of children to receive treat-
ment for immunization for diphtheria,
whooping cough and smallpox at the
Baby Clinic held in the Masonic hall
on Friday afternoon last, sponsored
by the Pincher Creek school division.

The Ladies Aid of the United church
are making preparations to hold a
tea on the afternoon of Saturday,
Feb. 16th.

Mrs. C. J. Bundy has gone to Van-
couver for a week's visit with her son
Jack and daughter Clara (Mrs. Vi-
tor Lewin), who now, with her hus-
band, resides at Massin on the Queen
Charlotte Islands.

Bill Cochrane was chairman when a
meeting of ratepayers of the local di-
vision of Municipal District 9 was
held here on Saturday afternoon for
the purpose of selecting a candidate
to succeed Noel Cox, retiring council-
lor, who has faithfully served over a
period of years. William M. Walls,
farmer near Cowley, was the unan-
imous choice of the meeting. A vote
of thanks was tendered Mr. Cox for
the splendid manner in which he had
fulfilled duties while in office. There
was a good attendance.

"V" CARDSTON TO BUILD NEW GRANDSTAND

The annual meeting of the Cardston
Rodeo Society was held recently with
C. B. Cheesman in the chair. The
following officers were unanimously
elected: President, C. B. Cheesman;
vice-president, Elsworth Bevans;
secretary-treasurer, O. D. Steed.

It was decided to build a new grand-
stand for the 1946 rodeo at a cost of
\$17,000. Shares valued at \$100 each
will be sold, and 10 or 15 redeemed
each year. The campaign will get
underway January 21.

Plans are being prepared by John
Mould. It is to be set back from the
track and will accommodate 2,000 per-
sons. Under the stand will be a dance
floor, rest rooms and refreshment
booths. New bleachers will also be
built.

"V"

Fire on Saturday evening destroyed
the wood section of the West Cana-
dian Collieries' steel tipple at Belle-
vue, doing damage estimated at up-
wards of \$30,000. The Blairmore fire
brigade were called to assist in fight-
ing the flames. Work at the mine was
not interfered with and continued as
usual on Monday morning.

A Vast Research Program

CANADA'S PART IN THE SCIENTIFIC achievements of the United Nations during the war has been acknowledged to be an outstanding one. Through the efforts of the science departments of the Canadian universities and of the National Research Council, under the direction of Dr. C. J. McEwen, formerly Dean of the Engineering College at Saskatchewan University, research was carried out on a scale unprecedented in this country.

As a result of this vast research program, valuable contributions were made to many branches of the United Nations war effort. Mr. H. H. Lank, vice-president of Canadian Industries Limited, stated recently that he believed that imagination was the secret weapon of World War II, and that the Allied nations won the war because, in addition to their gallant fighting men and their great industrial resources, they had scientists with imaginations more fertile than those of the enemy.

Hope To Make A Better Canada

A recent survey of the work carried on by the National Research Council during 1945, indicates that the expansion of its facilities during the war will not be curtailed, but will continue to be used for peacetime projects. In the Research Council, and in the universities, an ambitious program is now being undertaken, with the object of improving housing, food, health services, and in general to make this a better Canada. The work of the Research Council is closely associated with that of the Department of Reconstruction, and together they are expected to do much toward solving the many problems which are arising in the difficult period of transition from conditions of war to those of peace. Through the research work now being undertaken, it is hoped that more employment and higher income levels may be provided for Canadians in many walks of life.

Farm Surpluses To Be Studied

Of special interest in the Western Provinces are the studies which are being undertaken in the field of the utilization of agricultural surpluses and wastes. In this connection, reference is made to the fact that it has already been found that an excellent anti-freeze can be produced from wheat starch, and that wheat starch is also the basis for the production of many other chemical products whose value is much greater than that of wheat, which is the primary raw material. There are many problems connected with maintaining an intensive research program here. One of the greatest of these lies in securing sufficient funds to provide facilities and salaries for our scientific workers. In the words of the report: "research activity must be maintained on a steadily increased scale if Canada is to hold the place she gained during the war."

When your BACK ACHES...

Backache is often caused by **key kidney** action. When kidneys get out of order excess acids and poisons remain in the system. Backaches, headaches, rheumatic pains, disturbed rest or that "tired out" feeling may soon follow. To help keep your kidneys working properly—see **Dodd's Kidney Pills**. Time-tested, popular, safe, non-habit-forming. Demand **Dodd's Kidney Pills**, in the blue box with the red hand. Sold everywhere. 115

Increased Advertising

Better Year For Sales Promotion

More money will be spent in advertising in 1946 than in any previous year. Marketing's annual forecast of sales and advertising plans reveals. While increases in some individual cases are spectacular, the over-all picture indicates an increase of 15 to 20 per cent.

Undoubtedly there would have been a greater increase were goods in more plentiful supply—and indications are that the second half of the year will witness a definite gain over the expenditures of the first six months.

All forms of advertising are due for an increase—newspapers, magazines, farm papers, radio, direct mail advertising, poster and street car advertising.—Marketing.

MUST BE CHANGED

Ships properly camouflaged for one theatre of war would not be painted properly for other regions, due to different water colors and atmospheric conditions in various ocean areas.

The eyes control and direct most of the movement of hands and legs, and if the eyes are closed, a person will walk in circles.

ITCH CHECKED

For quick relief from itching caused by eczema, scabies, dandruff, sunburn, and other itchy skin conditions, use **MECCA OINTMENT**. It is the only ointment that gives instant relief. Get it today for 25¢ at **DR. H. H. PRESCRIPTION**.

Everybody Makes Them

Many Errors Found Even In Works Of Great Writers

An English clergyman, writing in the Sunday Times, claims to have discovered no fewer than 17 "howlers" in Rudyard Kipling's celebrated poem, "On the Road to Mandalay." His letter has set others to searching for further Kipling howlers. A certain Cmdr. W. G. Gerard of the Royal Navy has discovered that in Kipling's story, "Bread Upon the Waters," there is a sentence that describes "the three red lights in a vertical line—the sign of a steamer not under control." This, of course, is a nautical howler of the first order.

These curious slips in accuracy do not, of course, lower the status of Kipling as a creative genius. But they produce pleasant satisfaction by bringing the assurance that even the great are not immune to error.

Indeed, such connoisseur evidence is to be found in many eminent works. Sir Walter Scott, in his novel, "The Pirate," has the sun setting in the "Gervid" May. Hopkinson in his fine poem, "Epithalamion," has a swimmer—admirable fellow—preparing to bathe by taking his boots off. Even Shakespeare, the immortal bard of Avon, could have Hamlet speak of death as that "undiscovered" country from whose bourn no traveller returns—and this despite the fact that Hamlet had recently been conversing very intelligently on the battements with the ghost of his late father.

Yes, Homer nods. And lesser mortals are comforted.—Montreal Gazette.

DELIVERY BY AIR

A Manchester firm of lift and shutter manufacturers intend to operate their producing schemes on an entirely new basis. They have ordered a new Autster aircraft to be employed for transporting supplies and technicians by air to their customers. It is expected that this first aircraft will be the forerunner of a fleet of service aircraft to operate between their factories—and customers throughout Europe. The pilot of the first aircraft is an ex-convict pilot who before World War II was a member of the firm's staff.

NO CAUSE FOR ALARM

The sun, according to scientists is getting hotter as it burns up, instead of cooler, and at some time will either have to migrate to another planet, or roast. At the present rate, however, we'll still be comfortable here for several billion years.

Price Control And Rationing Information

Q—My butcher complained the other day that he was very short of "tokens." Have you any suggestions on how we could help our butchers keep a supply of these tokens on hand?

A—Ladies should hunt up any tokens they may have on hand and use them when purchasing meat and thus keep them in circulation. By doing this, the housekeeper will simplify their own rationing problems and those of their butchers, who thus will be saved the necessity of making frequent trips to banks for additional supplies of tokens.

Q—Are the prices of tires and tubes controlled by the Wartime Price and Trade Board?

A—New and used tires, retreading services and repairs to tires and tubes and replacement guarantees have their prices authorized by the Price Board.

Q—What coupons will we use when the present sugar coupons are used up?

A—When all the sugar ration coupons have been declared valid "B" coupons, which are in the present ration book, will be used. In February sugar coupon become valid.

Q—Where should a ration book be turned in when the owner dies?

A—To your local ration board.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your calling prices, mentioning the name of this paper to the nearest Wartime Price and Trade Board office in your province.

Lethal Weapon

Germans Had Developed A Device To

Out Short The War

A "sound gun," using waves to kill a man in 30 to 40 seconds, was under experimental development by the Germans in a last-minute effort to have of defeat, an army ballistic expert told super-scientists in Maryland.

Col. Leslie E. Simon, director of the ballistics research laboratory at the Aberdeen Proving Ground, disclosed the existence of the device, development of which was cut short by Allied victory.

Col. Simon told the American scientists that the "latent possibilities of this instrument should warrant further investigation."

Farmers Are Asked To Speed Grain Deliveries

WINNIPEG.—Plans for a continuous flow of export grain to the war-starved peoples of Europe call for the aid of prairie farmers who have been asked to increase deliveries to country elevators.

Shortage of wheat supplies in Canada and the major exporting countries will have to be met with available supplies of other food grains.

The Canadian wheat board made an appeal to prairie farmers for early delivery of grain stocks. Sufficient wheat will not be available from exporting countries to meet the needs of Europe before next harvest and there will be an increased demand for oats, barley, rye and corn supplies from North America.

The board said the countries of continental Europe are facing a food crisis of serious proportion, and urged prairie producers to do their utmost as long as we have cereals available for export.

Marketable stocks of wheat in farmers' bins are only about half what they were a week ago. In lakehead storage there are only 17,000,000 bushels of wheat compared with 47,000,000 a year ago, and stocks are low in country elevators.

Producers have marketed 180,000,000 bushels of wheat during the present crop year compared with 222,000,000 for the same period of 1944-45. Stocks in country elevators total 45,000,000 bushels.

"There is not enough wheat available for export from the chief exporting countries to meet requirements for the next six months of 1945," said the board.

"It is apparent that if the problem in Europe is to be met, it will be necessary during the next six months to use substantial quantities of grain other than wheat for human consumption."

During the last week Canada has made available 5,000,000 bushels of oats for shipment to Europe where it will be used for human consumption.

Breadstuffs constitute the most important item in the daily ration of the war-starved Europeans. There is an acute shortage of meals. With shippable stocks at the lakehead ports of Port Arthur and Port William, the board plans to build up available supplies for the opening of navigation.

"We would like to have marketable supplies shipped into country elevators so that the shipments to the lakehead can be stepped up in the next three months," a board statement said.

Producers were warned to keep necessary stocks of grains for seed, livestock feed and farm reserve, but were urged to speed up deliveries of all grains intended for market.

HAD READY SALE

War Surplus Gas Masks Picked Up Quickly In Calgary

CALGARY.—Calgary has gone all out in buying gas masks—yes, you've heard right—gas masks.

Calgary residents have taken a liking to these articles of military equipment.

In two days more than five dozen were sold, and the few remaining were disappearing fast.

Buyers are farmers who use poisonous powders on their crops, wheat for smut—painters who use spray gun and other workers who come in contact with poisonous fumes.

The lot of war surplus gas masks was put on sale as an experiment—and the experiment has turned out very well indeed.

PLANNING TO RETIRE

Earl of Halifax May Return To England In May

WASHINGTON.—The Earl of Halifax, British ambassador to the United States, is planning to retire this spring, probably in May, it was learned here.

Reports from London have mentioned Sir Archibald Clark Kerr, present British ambassador to Moscow, as the Labor government's choice to succeed Lord Halifax.

Lord Halifax is reported planning to return to his ancestral home in Yorkshire.

FEAR COURT ACTION

MONTREAL.—The Montreal Gazette said in a newspaper item that every bookie establishment in Montreal was closed in a "concerted voluntary action on the part of the operators resulting from fear of more severe police and court action."

WARSHIP ARRIVES

VICTORIA.—H.M.C.S. Crusader, 1,500-ton Crescent-class destroyer and Canada's newest warship, arrived here January 22, with two officers and 10 other Canadian army ranks from Portland, Eng. The ship left the Atore, Jamaica, Canada by way of the Azores, Jamaica, Panama, and San Pedro. 2657

MOUNT EISENHOWER—This towering peak, formerly Castle Mountain, was selected as the enduring tribute to the achievements of the commander-in-chief of the victorious Allies.

Peace Based On Social Justice Is Necessary

LONDON.—State Secretary Paul Martin, Canadian delegate to the United Nations Assembly, told the economic and financial committee that there has been too much "easy internationalism" in the past.

If the UNO is to maintain the confidence of the world, Mr. Martin said, this attitude must be avoided. He described "easy internationalism" as an attitude urging too great a distinction between resolutions adopted at international conferences and actions taken in pursuance of those resolutions.

Mr. Martin spoke on a British resolution urging states which have signed the United Nations Relief and Rehabilitation Administration agreement to contribute a further sum amounting to one per cent of national income to UNRRA at their earliest opportunity and that peace-loving states not signatories to the agreement should be asked to join.

Mr. Martin said circumstances had prevented UNRRA from achieving all the results originally hoped for and the discrepancy between North American living standards and those of war-ravaged countries was greater than it should be. He said the Canadian delegation felt that "terms and conditions in a relatively favored position should make efforts more strenuous than those hitherto put forward to reduce this discrepancy."

"There will be no enduring economic security in any part of the world so long as whole continents are suffering distress verging in certain cases on starvation," he declared.

Mr. Martin said Canada strongly supported the British resolution although he suggested redrafting in certain respects. The resolution suggested that no country had acted in accordance with the UNRRA-council resolution of August, 1945, whereas Canada had at least informed UNRRA that it was prepared to make its second contribution now.

He added that Canada also thought that all states, whether members of the United Nations or not, such as neutrals in relatively favored economic positions, should be invited to share the "noble work" of UNRRA.

Another Canadian delegation member, the committee told a press conference that only a peace based on economic and social justice can survive.

Gordon Graydon, Conservative member of parliament for Peel, said that Canadian delegates to the UNO assembly here, as at San Francisco, are pressing for an effective organization for human welfare.

WHEAT FOR FRANCE

Deliveries Will Be Speeded Up Says Canada's Trade Minister

LONDON.—Trade Minister James MacKinnon, whose plans to visit Paris were cancelled by bad flying weather, announced on his return to London from Brussels that Canada has decided on a 50 per cent increase in wheat shipments to France during the first four months of 1946.

He said the reason for the increase is to aid the republic in meeting serious wheat shortages. The exact tonnage of the Grain France will receive was not announced.

"The information I have received from the very best sources indicates that the need in France is very great as compared to some other countries which have been more provident in making arrangements to buy wheat," Mr. MacKinnon said in an interview.

The increased shipments represent a speed-up of delivery rather than a boost in the total tonnage to be provided during 1946, he said.

MOVEMENT GROWING

REGINA.—The Boy Scout movement in Canada is headed for an era of tremendous expansion, said R. C. Stevenson, chairman of the Dominion executive of the Boy Scouts Association, during weekend visit here.

"For three successive years there has been a healthy increase in membership," he said. "Canadian scouts totalled more than 95,000 at the end of 1945."

CLEARER RECEPTION

Alberta Government Applies For A Frequency Modulation Wave Length

EDMONTON.—The Alberta Government has applied to the Canadian Broadcasting Corporation for a frequency modulation wave length that would greatly increase the clarity of broadcasts from the government's radio station CKUA, Works Minister W. A. Fallow said.

The minister said he did not know how many other radio stations had made application for frequency modulation but that CKUA "certainly was one of the first."

FAIR DATES

WINNIPEG.—Dates of exhibitions on the class B circuit were announced here following an executive meeting of the Western Canada Fairs Association. The dates are: Weyburn, July 2-3; Moose Jaw, July 2-3; Estevan, July 2-3; Portage la Prairie, July 11-13; Yorkton, July 15-17; Melfort, July 18-20; Lloydminster, July 22-24; Vermillion, July 25-27; Vegreville, July 28-31; Red Deer, Aug. 1-3; North Battleford, Aug. 5-7; Prince Albert, Aug. 10.

When the last session ended Dec. 15, parliament was prorogued until Jan. 28. The department said that a new proclamation is being issued prolonging the prorogation date until March 8.

"The pro forma proclamation does not preclude the issuance of another proclamation, if necessary, summoning parliament for the dispatch business, either before or after March 8," said the announcement.

EXPLAINS DECISION

Vokes Contends Death Penalty For Kurt Meyer Was Unjust

BAD ZWITERSCHEN, Germany.—A conversation with Maj.-Gen. Chris Vokes, Canadian Army commander who commuted the death sentence of Maj.-Gen. Kurt Meyer to life imprisonment, indicated the Canadian general felt the Meyer conviction of responsibility in the killings of Canadian soldiers did not carry a mandatory death sentence such as would follow a conviction for murder in a civilian court.

Meyer, an S.S. regimental commander in Normandy during the invasion in June, 1944, was convicted and sentenced to be shot for responsibility in the deaths of Canadian prisoners of war, but he was acquitted on a charge of directly ordering the killings.

Gen. Vokes is known to feel that a general is the servant of the state whose responsibility is to commit troops to battle under the best possible terms and therefore it is unjust to hold him responsible with his life for every act committed by every soldier engaged in subsequent fighting unless it can be definitely established he is fully aware of those acts or gave specific orders demanding them. Gen. Vokes is believed to have found these factors lacking.

HAS BEEN EXTENDED

Date For Reconvoking Of Parliament Is Now March 8

OTTAWA.—The pro forma date for the reconvoking of parliament has been extended from Jan. 28 to March 8, but this does not mean that the session will begin on the latter date, the secretary of state department has announced.

When the last session ended Dec. 15, parliament was prorogued until Jan. 28. The department said that a new proclamation is being issued prolonging the prorogation date until March 8.

"The pro forma proclamation does not preclude the issuance of another proclamation, if necessary, summoning parliament for the dispatch business, either before or after March 8," said the announcement.

"We believe our export trade with Latin America can rise to \$200,000,000 annually in the near future."

The 10-fold increase from pre-war days.

Canada's wartime industrialization may change the character of her exports to Latin America, but this does not mean imports must be reduced.

Canadian government departments for months have been studying "how best we can increase and diversify our imports from the United Kingdom."

It is impossible to exaggerate the significance of the United States part in the movement to liberalize the world of trade, a direct reversal of the American policy of commercial isolation after the last war.

APPOINTED ADJUTANT-GENERAL

Maj.-Gen. Ernest G. Weeks of Ottawa has been appointed adjutant-general of the Canadian army to succeed Maj.-Gen. A. E. Walford, whose retirement was announced.

Maj.-Gen. Weeks recently returned from overseas where, after service in Italy and northwest Europe, he became major-general in charge of administration at C.M.H.Q. at London.

British Import Controls May Be Loosened

LONDON.—Loosening of British import regulations to permit free entry of Canadian goods to the United Kingdom was forecast here by James MacKinnon, Canadian trade minister.

Speaking at a Canadian chamber of commerce luncheon in honor of Field Marshal Alexander, Canadian governor-general-designate, and Sir Stafford Cripps, president of the board of trade, Mr. MacKinnon also said:

1. Canada will continue to rely heavily on trade with the United Kingdom and the United States but must find new markets and will "spare no effort" to gain a fair share of European, Commonwealth, Oriental and Latin American trade.

2. "We believe our export trade with Latin America can rise to \$200,000,000 annually in the near future."

3. Canada's wartime industrialization may change the character of her exports to Latin America, but this does not mean imports must be reduced.

4. Canadian government departments for months have been studying "how best we can increase and diversify our imports from the United Kingdom."

5. It is impossible to exaggerate the significance of the United States part in the movement to liberalize the world of trade, a direct reversal of the American policy of commercial isolation after the last war.

WHEAT PRODUCTION

Domestic Bureau of Statistics Gives Third Estimate For 1945

OTTAWA.—Production of wheat in Canada in 1945 was estimated by the Dominion bureau of statistics at 35,912,000 bushels valued at \$324,227,000, compared with a 1944 crop of 41,635,000 bushels valued at \$440,427,000.

The figures were given in the bureau's third estimate of 1945 field crops.

The reduction in cash value was attributed entirely to lower production as the average farm value of wheat per bushel remained steady at \$1.06 for the two years.

Wheat production in the prairie provinces during 1945 was estimated at 282,000,000 bushels against 391,700,000 in 1944.

The 1945 oat crop totalled 381,600,000 bushels, compared with 499,600,000 bushels. The 1945 barley crop, now estimated at 157,600,000 bushels, was below 1944 production of 194,700,000 bushels. Rye production for 1945 at 5,900,000 bushels compared with 1944 production of 6,500,000 bushels. Flaxseed production at 7,600,000 bushels was 2,100,000 bushels lower than 1944 production.

With the exception of flaxseed and rye, the average values per bushel at the farm for the major field crops were approximately the same as in 1944.

SETS NEW RECORD

OTTAWA.—In a range and fuel test, an Australian-built Mustang fighter made what is believed a new record for single-engine fighters, flying 1,960 miles from Darwin, Australia, to Melbourne in eight hours and 10 minutes, an average speed of 241 miles an hour, the Australian high commissioner's office announced.

AGAINST THE LAW

OTTAWA.—The prices board said that restaurants may not serve unrationed meats, such as liver or kidney, on meatless Tuesdays and Fridays. Although some restaurants across Canada have been under the impression that they may serve unrationed meats on meatless days, Tuesday and Friday, this is definitely not the case, a statement said.

Critical Attacks Answered By Gen. MacArthur

TOKYO.—General MacArthur's headquarters' spokesman rebuked Tass News Agency for lending itself to what he termed "a definite program to discredit" the Allied supreme commander in Japan and "force further changes in the present occupation policies and command."

He referred specifically to a Tass dispatch from Hefei, Korea, which said:

"The behavior" of the American Command in Southern Korea astounds one. It has assumed a position of inspiring reactionary demonstrations against the decisions of the Moscow conference of foreign ministers in which, as is known, the government of the United States participated."

Southern Korea is under the direct command of Lt.-Gen. John R. Hodge, but is included in Gen. MacArthur's jurisdiction. The Russians control Korea north of the 38th parallel.

"It is known, Gen. MacArthur's spokesman said, 'that orders have gone out to all opposition forces, including the so-called Communist party members in Japan, to try their utmost to discredit MacArthur.'

"It is a deplorable condition when some of the disloyal Press of the world continues to incite and foment international hatred and animosity 'now, more than ever, every effort should be more toward understanding and agreement.'"

He added: "It can be expected that continuing critical attacks will flow from the left-wing Press of the United States" as well as other international forces. "The momentary setbacks in the campaign" will merely spur these elements to a more studied plan of attack."

He denounced particularly reports which "incite suspicion in international circles," and cited as an example a recent report that Gen. MacArthur had opposed the use of Russian troops in his command.

JAVA SITUATION

Indonesians Want British Troops To Remain

BATAVIA.—Premier Sutan Sjahrir of the unrecognized Indonesian Republic and an official of the Netherlands East Indies Government both said that they opposed the withdrawal of British forces from Indonesia as a result of the war.

The Ukrainian Soviet Socialist Republic asked the Security Council of the United Nations Organization to put the question of "provisional action" in Indonesia, and asserted that British troops as well as Japanese armed forces were taking part in military actions against the local population in Indonesia.

Sjahrir said that if the Russians did not mind, the Indonesians would prefer that the British forces remain in the islands until the Japanese had been disarmed and removed.

Peter Klerstein, education director of the Netherlands East Indies Government and former minister of economics, said: "It would be irresponsible if the British withdrew utterly, and disavow for the Indonesians for the British to withdraw would mean sacrificing the Indonesians to Soviet propaganda."

PRICE OF SUGAR

Canadian Retail Prices Will Remain Unchanged

OTTAWA.—An expected increase in the price of imported raw sugar will be absorbed through the sugar stabilization fund, built up over the last few years, with Canadian retail prices remaining unchanged, the prices board said.

"There is no intention of authorizing any increase in the price of sugar in Canada," said a board statement, referring to a Washington report that sugar prices in the United States will be raised by possibly a half-cent a pound next month to meet the anticipated increase.

An increase in returns to Canadian sugar beet growers this fall will be granted without increasing the price of sugar to consumers. Increased assistance to beet sugar will amount to 60 cents for every 100 pounds, the entire amount going to the growers to increase their returns by approximately \$15.0 a ton.

READY TO JOIN

LONDON.—Argentina said she was ready to join the United Nations Relief and Rehabilitation Administration and had already contributed one per cent of her national income in foodstuffs and other goods to the relief of war-ravaged countries. Argentina is one of the five United Nations not in UNRRA.

CAN WEAR MEDAL

OTTAWA.—The British government has advised that members of the corps of Canadian firefighters who served in the meatless days, now more are entitled to wear the Defence of Britain medal.

A LONG WAY FROM CORRIDOR FOR COMMANDER—General Jonathan M. Wainwright, recovering from his ordeal at the hands of Jap captors in the Philippines, recalls old cavalry days at Fort Bliss, Texas, on a recent visit there. He is pictured with S-Sgt. Bob Smith of the First Cavalry Division, who served under him, and "Reno Noble," champion horse at the fort.

DUCKS UNLIMITED RECEIVES PRAISE

Termed a "conservation miracle", the accomplishment of the organization known as Ducks Unlimited, in boosting the continent's wild duck population by 500 per cent since 1938, is described by S. Kip Farrington, Jr. in the Readers Digest for February.

Mr. Farrington's article, condensed from Maclean's, says that various activities of Canadian homesteaders are responsible for reducing duck number from an estimated 400 million in 1875 to 27 million in 1935. Turning the Canadian prairies into an "empire of wheat" meant, in an addition to wholesale slaughter of ducks, the draining of marshes, the felling of woods that had retained moisture, the trapping of beaver and the breaking of their water holding dams. A drought in 1929-30 came dangerously near wiping out the already depleted waterfowl, 70 per cent of which, the author says, are hatched on Canadian breeding grounds.

The article tells how Ducks Unlimited, aided by Canada's provincial and national governments, private companies and farmers, provided permanent bodies of water to 631,000 miles of nesting ground and waged war on duck predators, chief of which are crows and great northern pike.

A by-product of Ducks Unlimited's work has been the benefits derived by farmers and ranchmen. More than 100,000 head of cattle now water on DU projects. Flood irrigation of hay crops has increased production for winter feeding. One area of reclaimed marshes, barren of fur for many

years, is now producing \$30,000 in muskrat pelts annually.

LABOR NEEDED IN LUMBER CAMPS

There is an urgent and immediate demand for workers in Canada's logging, pulpwood and lumber camps, and an extensive campaign by the National Employment Service to recruit men for the woods industry is now underway.

Never in the nation's history has the need for the products of our forests been so great as it is today. Canada's number one item on its peacetime programme is the construction of homes for our war veterans. Lumber is also needed for our industrial reversion program and for shipment overseas. In addition, huge quantities of pulpwood are required for the pulp and paper industry. The manufacture of paper and newsprint is most essential, not only for our own consumption, but also for our export trade. Every man who accepts employment in the woods now is helping to provide jobs for others.

About 3,000 workers are needed immediately in the Prairie Region alone. Farmers and farm laborers who are not at present required on the land are particularly urged to apply.

The wages are attractive, with most of the vacancies for piece work; but some openings are also available on a monthly basis. The food is good and wholesome, and operators have greatly improved camp accommodation during the war years. In addition, transportation will be supplied to approved applicants.

Application should be made at the nearest National Employment Office, where all further information on employment in the woods industry will be furnished.

Federal Government payments to veterans and expenditures on their behalf will total an estimated \$596,000,000 in 1946.

W. J. HENNING

MILLING COMPANY APPOINTEES

Robin Hood Mills Limited announces the appointment of W. J. Henning as general manager of sales in western Canada. Mr. Henning has been with Robin Hood for 25 years and, apart from six years with the company in Montreal, has been situated in western Canada.

The company also announces the appointment of W. L. Hinchey as sales manager of Alberta, and S. E. Knight as assistant sales manager of the province. Starting with the company in British Columbia, Mr. Hinchey was transferred to the Alberta sales division a year ago. Mr. Knight has been a member of the Robin Hood sales organization for the past forty-one years.

Pte: "My wife always gets historical when I stay out late at night."

"Hysterical, you mean."

"No, historical. She digs up all my past."

He came home with some candy concealed in his coat pocket. "Now, children," he said, "who has been the most obedient during the month and done everything mother asked?"

"You, daddy," the oldest youngster replied.

W. L. HINCHEY

Russia is planning on building a number of moving sidewalks.

"How come you didn't turn out?" demanded the sergeant. "Edna? You hear the bugle blow reveille?"

"Honest, Sergeant, I'm afraid I'm going to be a flop as a soldier. I don't know one tune from another."

S. E. KNIGHT

George Allan, of MacLeod, recently underwent an operation at the Col. Belcher hospital, Calgary.

Attorney: "Where did the car hit you?"

Indy: "Well if I had been wearing a license plate it would have been badly damaged."

INSECTS CANNOT ATTACK THIS FURNITURE

A new type of furniture for export to eastern and tropical countries, which is unaffected by climatic conditions or attack by insects, has been developed in the United Kingdom. Some thousands of the chairs and tables have been produced and are already in use with the SEAC forces. The framework of the chairs and tables are prefabricated from steel tubes, while the seats and table tops are made from heat and insect resistant plastics, which can be provided in a range of colors to meet the overseas customers' tastes. Following research the seats have been moulded to give comfort equivalent to that of a sprung leather or canvas chair.

TO BE POPULAR as a hostess, serve Maxwell House Coffee. It contains choice Latin-American coffees . . . the finest obtainable. It's blended by experts with traditional knowledge and skill.

WHAT YOUR LIFE INSURANCE DOLLAR IS DOING NOW

25^c IN PUBLIC UTILITIES, INDUSTRIES ETC.

This portion of every dollar invested out of Life Insurance funds helps to finance thousands of building and transportation projects, public utilities, industries, etc., which create employment throughout the country. The remainder is in government and municipal bonds, farm and town mortgages, etc. In addition, \$500,000 is paid out in direct benefits every working day to policyholders or their loved ones.

It is good citizenship to own LIFE INSURANCE

A message from the Life Insurance Companies in Canada.

MEN WHO THINK OF TOMORROW ARE PLANNING "COOKING WITH LIGHTS"
 Miracles of cookery performed not by the heat of a fire, but by the heat of light, are planned for the kitchens of tomorrow! Ovens lined with "electric light bulbs" will cook your foods better in shorter time with the even, easily controlled penetrating heat of infra-red rays! It's better things for living such as this that your Victory Bonds will buy tomorrow!

Men who think of tomorrow say

"HOLD ON TO YOUR VICTORY BONDS

TODAY"... VICTORY BONDS have helped us to fight and win a war.

They've minimized the danger of a war-inflation economy.

They've formed a backlog of safely-invested buying power that will benefit the individual and the nation when the danger of inflation is over.

But remember: inflation strikes hardest after a war.

What our Victory Bonds will do—is to keep prices down until supply meets demand... when a dollar will buy a full dollar's worth of goods.

Think of tomorrow before thinking of cashing a Victory Bond!

THE HOUSE OF SEAGRAM

WORLD HAPPENINGS BRIEFLY TOLD

The quinquennial census of the prairie provinces will be taken this year, beginning in June.

In Hayward, Calif., Harold Sexton was arrested for overcrowding his taxi. His payload: 18 passengers.

A number of houses at Broadstairs, England, were damaged severely by a blast when a mine exploded on the shore recently.

Britons who have a plane and a licence were authorized to start flying again on Jan. 1. Many areas remain restricted, however.

Fourteen dozen yellow and white chrysanthemums were flown to England recently, the first flowers from the Channel Islands since 1939.

A use has been found for 30 life-size photographs of Hitler, seized at the German embassy. They'll be used to decorate dark boards, in London.

A special award of the defence medal has been made by the King to the Duchess of Kent, in recognition of her services as commandant to the Women's Royal Naval Service.

A royal prayer book written in 1500 was sold for \$1,000 (\$4,000) at Sotheby's auction rooms, London. It was once a gift from the King of Navarre to his daughters' governess.

Alberta's population has increased by nearly 41,000 during the past year, so ration book statistics indicate. The greater part of this increase is believed to be due to the return of discharged servicemen.

Strathloch, Scotland, has no singing telegrams, but they are often shouted across the river which separates the post office from this Inverness village. When flood conditions prevail the stream is impassable.

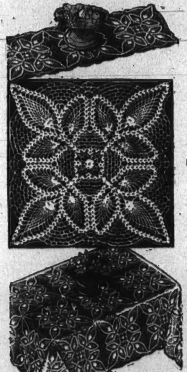

Poultry Pests

The Common Bedbug Is Often Troublesome To Poultry

Usually considered only as a pest to man, the common bedbug and several other allied species are often troublesome to poultry. Only at night when a blood meal is required, the bugs search out their victims, and at other times secrete themselves in cracks and crevices. Small, elongated white eggs are deposited in these hiding places, up to 200 eggs being laid by each female. The young bugs produced from these eggs are similar in appearance to the adults but are paler in colour, their only food like that of the adults being blood. They can live, however, for several months without a meal. The life-cycle from egg to adult may be completed within six weeks but is often much more prolonged.

One of the simplest and most satisfactory control measures for infested chicken houses is to spray all cracks and crevices in woodwork and roosts with creosote oil or crude petroleum. If complete eradication is not effected by this treatment, it should be repeated after about ten days.

Three For Scarf

7432

by Alice Brooks

Such relaxing needlework, this crocheted square — so lovely, used singly or joined! Only 20 make a 64 x 80-inch cloth in string. These crocheted squares, 12 inches in No. 30 cotton, 16 inches in string, have many uses. Pattern 7432 has directions; stitches.

To obtain this pattern send twenty cents in coin (stamps cannot be accepted) to Household Art Department, Winnipeg Newspaper Union, 315 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

RADAR FOR WHALERS

Several British whaling expeditions are to be equipped with radar apparatus and means are to be provided for taking bearings on whales both on and below the water.

Conscience is what makes you tell your wife something before somebody else does. 2507

Major Allan Brooks at His Ensign

WORLD-FAMOUS ORNITHOLOGIST DIES IN B.C.—Major Allan Brooks, 76, D.S.O., famed the world over for his bird illustrations and well-known ornithologist, who recently died at his home in British Columbia. A student of birds all his life, he wrote many articles in leading ornithological journals in Canada, Britain and the United States.

Precision Engineering

Machines Developed In Britain For Wartime Purposes

Examples of the skill of British precision engineering which revolutionized war production and which will help to win the United Kingdom's peace production drive were on show for the first time in London. They were seen at the London Exhibition of the United Kingdom gauge and toolmakers.

The most striking feature of the exhibition is the number of entirely new machines developed for wartime purposes which can be turned straight over to peacetime production.

For example, there is an air operated multiple gauge designed for the highspeed testing of cannon shells. The gauge enabled unskilled workers to test up to nine hundred shells hourly with diala registering errors of half a thousandth of an inch in each of six different dimensions.

Another example of wartime engineering achievements available for increased peacetime production is a can-milling machine built by the Coventry Gauge and Tool Co. It turns out form millings in any desired shape to an accuracy of one millionth of an inch in any direction.

Several types of gauges working to the limits of one millionth of an inch are exhibited. One of them records on a loud speaker when the diala are in position for accurate reading.

British precision industries' wartime achievement constitutes one of the most spectacular stories of the United Kingdom war record. Before the war half of the fine measuring instruments used by United Kingdom engineers came from overseas.

But this equipment is also available for overseas—and the London exhibition is being visited by large numbers of precision engineers interested in purchasing the new peacetime machines.

The high quality of British engineering goods is due to a considerable extent, to the equipment supplied by the precision tool manufacturers. But this equipment is also available for overseas—and the London exhibition is being visited by large numbers of precision engineers interested in purchasing the new peacetime machines.

Canadian Authors

A Drive To Establish A Fund To Assist Writers

A drive to obtain an adequate capital endowment for the assistance of outstanding Canadian authors who find themselves in pinched circumstances through age or infirmity is an objective of the Canadian Writers' Foundation.

The Foundation, organized in 1931, was incorporated last year. One of the originators and chairman of the present executive is Dr. Pelham Edgar of Toronto.

"In the lifetime of the literary artist, even the man of high genius, neglect and the poverty it engenders are the fate he not infrequently encounters," writes Wilfred Eggleston, honorary secretary of the Foundation. "Until 15 years ago, if a Canadian writer fell upon days of adversity when his productive years were over he was entirely at the mercy of such casual or desultory aid as might appear. Since then a national organization has been seeking, modestly at first, more ambitiously now, to grapple with the problem on a scale commensurate with the need."

At the time the Foundation was organized, the economic depression discouraged a public appeal, but from 1933 to 1943 a small annual appropriation was obtained from the Dominion government. At present there is no government assistance. For 10 years Charles G. D. Roberts, whose prose and poetry had done much to make Canadian literature known to the nation's people, and about 100 present beneficiaries include an outstanding poet who is just recovering from a two years' illness, and a novelist who for two years has been ill and unable to use his hands.

OIL WELLS IN BRITAIN England now has 240 oil wells, producing about half a million barrels of crude oil a year. They were drilled during the war by an Oklahoma contractor for the British government.

Since 1696, there have been 21 major earthquakes in Japan, each of which has killed more than 1,000 persons.

WILL VISIT CANADA IN AUTUMN

—Rt. Rev. Geoffrey Francis Fisher, Archbishop of Canterbury, will visit Canada and the United States next September, it has been announced. He has accepted an invitation from the primate of the Anglican Church of Canada to attend a general synod at Winnipeg, Sept. 8. This will be the first time an Archbishop of Canterbury has visited Canada.

At present, Ontario is the only province with compulsory milk pasteurization legislation on its statute books. The Dominion Council of Health, at its annual meeting here, passed the following resolution:

"Be it resolved that the Dominion Council of Health... commend the campaign recently undertaken by the Health League of Canada to encourage the pasteurization of milk throughout Canada."

The Council membership includes the federal and provincial deputy ministers of health.

The Parliamentary Committee approved the following resolution:

"Resolved that this Voluntary Committee on Health of members of the Senate and House of Commons go on record as expressing the opinion that universal pasteurization of milk is in the interest of the Canadian people. That as this matter does not come within federal jurisdiction the provincial governments will again consider the possibility of enacting legislation to enforce pasteurization."

A Favored Country Canadians Should Realize What They Have To Be Thankful For

A St. Mary's resident was heard to say on the day after the New Year holiday, that he was literally fed-up on too much turkey, dressing, plum pudding and mince pies and that he would be glad when the last of the fowl were eaten up and the ordinary not-so-rich fare was substituted. There are not many in this district who fare less well, as all kinds of fowl and other good things were in abundance here and some families had as many as four turkeys to spread over the two holiday periods. To those who have just come home from Europe, it was a great time of feasting, of good cheer and good fellowship, but in the back of one's mind there has always been the thought that countless thousands across the Atlantic were having less to eat than ever in the days of desolation after the Second World War. There are a lot of things Canadians can be thankful for but probably the greatest is this wealth of food and fuel which we enjoy, even with the rationing restrictions in force. —St. Mary's Journal-Argus.

COMFORT TEMPERATURE

The human body is so constituted that it functions best at temperatures of 60 to 70 degrees for those who wear civilized clothing and at somewhat higher temperatures for unclothed people.

LIFE'S LIKE THAT

By Fred Neher

"With the comic books he reads and the radio serials he listens to, you're simply wasting your time trying to frighten him with threats."

REG'LAR FELLERS—Heating Problem Solved

Health LEAGUE OF CANADA presents TOPICS OF VITAL INTEREST

FASTEURIZATION CAMPAIGN GAINS FURTHER SUPPORT

Support for the current campaign of the Health League of Canada which is aimed at obtaining compulsory pasteurization of milk through the nation came recently from two authoritative sources—the Dominion Council of Health and the Parliamentary Voluntary Committee on Health.

At present, Ontario is the only province with compulsory milk pasteurization legislation on its statute books. The Dominion Council of Health, at its annual meeting here, passed the following resolution:

"Be it resolved that the Dominion Council of Health... commend the campaign recently undertaken by the Health League of Canada to encourage the pasteurization of milk throughout Canada."

The Council membership includes the federal and provincial deputy ministers of health.

The Parliamentary Committee approved the following resolution:

"Resolved that this Voluntary Committee on Health of members of the Senate and House of Commons go on record as expressing the opinion that universal pasteurization of milk is in the interest of the Canadian people. WHAT OIL FIELDS ARE

Oil fields of the world actually are graveyards of animals and plants which have been subjected to millions of years of heat and pressure beneath the earth's surface.

Weekly Ration Fashion for a family of four

SUN.	MON.	TUES.	WED.	THU.	FRI.	SAT.
Roast Lamb	Curry of Lamb	Vegetable-Egg Scallop	Beef-steak & Kidney Pie	Frankfurters	Fish Dish	Stuffed Flank Steak
Group B	left over roast	unrationed	Group B	Group E	unrationed	Group B
3 lbs.			3/4 lb. beef round (kidney unrationed)	1 lb.		1 1/2 lbs.
2 coupons			4 tokens	3 tokens		1 coupon
1 token for 6 ounces of cooked meats						

The family's penchant for a Sunday roast could be pleasantly met by a three pound rolled shoulder of lamb.

A tempting remake for Monday would be a tasty lamb curry. Aside from this, you may have some useful odds and ends for luncheon sandwiches. A vegetable-egg scallop can appetizingly and satisfyingly solve the problem of a meatless meal for Tuesday. Just alternate layers of the family's favored vegetables, hard cooked eggs, and flavoured cheese sauces, top with buttered crumbs, and oven heat until bubbling and browned. Good companions for it would be hot scones and a crisp cabbage salad. Steak and kidney pie on Wednesday is an excellent dish—tastefully and nutritiously satisfying winter appetite. For Thursday, plump frankfurters, along with sauerkraut and jacket boiled potatoes, are suggested for appealing thrills. And on Friday unrationed fish, done to your liking, will bring the goodness of the sea to your table. A flank steak encircling a savoury dressing will take care of Saturday's dinner. It should leave you with a comforting something to tuck away in the ice box. You may care to devote the remaining token of the week to 6 ounces of cooked meats for luncheon menus, or to augment the cold sliced flank steak for Sunday supper.

Train Pipers

Poles Were Taught To Play The Bagpipes

The Fifehead Society of Scotland helped train 93 Canadian army pipers during the war, in courses given at Edinburgh Castle.

Pipe Major William Rose, M.B.E., noted Scottish bagpipe instructor, taught 713 pipers from British Dominions and even Polish forces during the last six years. Canadians who attended more than one course on the finer points of pipeplaying, included Pipe Majors Esson, Vancouver; Neil Sutherland and Malcolm MacKinnon, Calgary and Sgt. Armstrong, all of the Seaforth Highlanders of Canada; Pipe Major D. Sutherland, Canadian Black Watch; Pipe Majors Duncan and Scott, Cameron Highlanders of Ottawa and Pipe Major Noble, Argyll and Southern Highlanders of Canada.

There are more than 130 species of trees in Canada.

Something Universal

Back Seat Driver Is Not Peculiar To Any Country

Sometimes it seems that the Russian people are as remote from our understanding as they are from our sight. For example, it must have seemed odd, if admirable, to many Canadians that a Russian husband and wife should have bought a tank with their own money, operated it in Poland, Czechoslovakia and Germany, and killed 150 enemy soldiers. But if the Canadians read to the end of the story, they would have found that the husband did the driving and the wife did the bossing. The back-seat driver, then, is a Russian institution, too. Knowing that we somehow feel that world brotherhood is a possibility after all—Kitchener Record.

PLANNED REFORMS IN ASIA

The British took the island of Cyprus from Turkey in 1878 as part of a plan for the introduction of reforms in Asia Minor.

DON CAMERON SHAVER

THE CHICAGO SUN SYNDICATE

THREE long and valiant years ago, Corporal Loren LaFond was killed for this day. Now he was home again. Home to his beloved mountains.

This was the day of days—the first day of deer hunting. Since he was fourteen, when grandfather gave him his first rifle, Loren had hunted deer and, until he enlisted, he never missed an opening day.

The fact that this, therefore, would be a different kind of deer hunting did not entirely spoil his day. Since Loren there would be no still hunting, at least not for a long time, no trailing of wily bucks, miles and miles over the hardwood ridges, through dense spruce swamps, hoping to outwit a crafty animal for a successful shot. Loren's left leg was still weak and the foot dragged a little, but he considered himself lucky, after the mortal shell burst in his face, to have a leg at all, and thanks to the medical staff. It would be quite impossible to stalk and trail a smart old buck with one weak leg and a dragging foot. But, if he could get one, the meat would be more than welcome at his home down in the valley.

The bright leaves came floating down. Though Loren walked slowly, and with a noticeable limp, his worn shoe-paces made no noise in the old lumber road. Dark eyes studied the trail sign and sharp ears were alert to every forest sound. Mark of a spring fawn's little feet beside the slender hoof prints of the mother doe. The rounded deer impressions where a heavy buck had passed.

At Wolf Rock, Loren left the old log road and made his way slowly and carefully to the top of Windy Ridge, connecting Cat Mountain with Old Tobie, where he knew of a natural deer crossing. This was a likely place to intercept a buck disturbed by drivers on the opposite ridge and seeking safety in the rocky heights above. In the distance he heard a rifle shot, another and another.

"One shot, meat," repeating the old saying to himself, with a grin. Two shots maybe, three shots still at the top for supper!

At the top of the ridge he selected a convenient rock, where he could stretch out his aching leg and rest

his back against a tree. The warm October sun filtered down through the lacy pattern of interlaced branches overhead. High against the blue a red-tail hawk swung in tire-circles. A quill rustling pointed pine lumbered past. A flock of little red capped birds twittered their happy way southward through the trees. A tiny weasel, changing from summer brown to winter white, raced in and out of rock crevices hunting deer-mice. Then, far down the slope, a shadow moved. Watching closely, Loren saw that it was a big buck, and coming his way. Ordinarily this buck would have been bopped down for the day. Evidently it had been aroused by hunters and knew that it was being hunted.

THE buck came slowly up the wooded slope, antlered head swinging low, stepping carefully to make no noise, taking full advantage of the cover. Loren knew that a buck runs only as a last resort, with long legs and specially developed muscles to carry it bounding over twelve foot obstructions, leaping thirty and more feet at a stride. Every few careful steps the buck necessarily less extensive, in the Cereal Division, Ottawa, and the Dominion Experimental Farms, and provincial Universities in Western Canada, in respect of the testing for disease resistance in new productions of cereals and flax.

As the buck came nearer, Loren could see that it had been wounded. From time to time it turned to lick a bleeding cut high on the left quarter. It fairly crawled up a shallow ravine, ducking under a windfall it easily could have jumped over, but that would be too conspicuous.

Nearing the top of the ridge the buck "froze", breathing deeply, evidently a bit of man scent warned it of danger ahead. A few slow and cautious steps and it laid down on a small hollow, with only the antlered head, on long neck raised to watch, polished horns looking like a bit of dead brush. Then, Loren saw the hunter coming up the slope, a heavy man in red mackinac coat, noisily crushing dry leaves, watching the woods ahead, automatic rifle ready, but paying no attention to the faint trail. The red coat passed within a few yards of the hidden buck, never suspecting it was there, and disappeared down the hill.

Loren was so engrossed watching these safety precautions of the hunted that he almost forgot that he was the hunter, with a loaded rifle across his knees. Now, at point blank range, he remembered the gun. Waiting until the buck's head was turned, he raised the rifle quickly. In that instant, as his eye sought the life signs, there flashed through his mind the memory of another hunt—

He saw a wounded Yank, helmet and rifle gone, in torn GI uniform, splashing through the mud and water of a rice paddy, in a hall of bullets, falling and rising again and again. Excited Japs splashing after him, screaming, shooting, racing from all sides to head him off, to kill him. The hunted man ran limping down a hedge row, threw himself into irrigation ditch, along which he crawled with speed, to gain a maize field.

From field to field they harried him, beating up the cover, showering every movement with bullets. Exhausted, hurt, the hunted man laid down when he dared, sinking away again when the noisy hunt came close, using all the craft and cunning learned from wily bucks he had hunted, not always successfully. He ducked "froze" where they would be least likely to look for him, and slid unobserved into the muddy water of the rice paddy. Drowning, but his face he covered this with a handful of water weeds and laid there until darkness and the hunt was over for the day.

THE picture faded away—the rifle came suddenly down. "I don't believe I ever will hunt again," he said aloud.

The surprised buck bounded away. Loren got up, rubbed circulation back into his aching leg, and started homeward.

Answer Was Surprising

Author Found Out What Josef Stalin Likes. And Dislikes. When Likas Forbes, author, journalist and traveler, met Josef Stalin some years ago—before the war—he asked him "what he liked best in life—outside the terrible work which he first inspired him."

He considered the matter, and said: "Dogs, children, my own people, the workers in Georgia among whom I first raised."

"And what do you dislike most?" pursued Miss Forbes.

The answer," she says, "was surprising and directed in an unusual rapid murmur to his wife—was accompanied by a smile. With a key in her hand the young woman translated, laughing. "He says, large mountainous females full of words."

PUT TO NEW USE

A factory which turned out poison gas at Cape Town for the use of South Africa's armed forces in the event of an emergency, is to be converted for the production of the insecticide DDT. The powder will be used to fight diseases, pests and plagues in the Union.

RUST LABORATORY

Plant Located at Winnipeg Is Doing Good Work

The Dominion Laboratory of Plant Pathology at Winnipeg—popularly known as the Rust Research Laboratory—is the centre for investigations on rusts, smut, and bacterial diseases of cereals and flax rust. It is responsible for certain investigations on root rots of cereals and for the seed-borne disease examination of foundation, elite, and registered cereal seed samples originating in Manitoba, Ontario, Quebec, and the Maritime Provinces. Attention is given to some of the other diseases of cereals and flax, and to vegetable diseases that are locally of economic importance.

Laboratory and greenhouse accommodation is provided in the Winnipeg Laboratory for the Dominion Cereal Breeding Laboratory (Cereal Division, Experimental Farms Service), and extensive co-operative work in the production of disease-resistant varieties of wheat and oats is carried on by the staffs of the two Laboratories. Similar co-operation, although necessarily less extensive, is afforded the Cereal Division, Ottawa, and the Dominion Experimental Farms, and provincial Universities in Western Canada, in respect of the testing for disease resistance in new productions of cereals and flax.

THE ONE QUALIFICATION

Elsa Maxwell, New York's famous party woman, defines a lady as "a woman who has as much consideration for others as for herself. There's a lot of women who will have to change their habits and customs before they can measure up to that definition."

Pictured here is the Macdonald Brier Tankard and Trustees for this emblem of the Canadian single rink curling championship. Chairman Thomas Rennie of Toronto, and Senator John T. Haig, Winnipeg, are original board members. Hon. Thane A. Campbell, P.E.I., re-elected last Col. Percy D. Lyall, Montreal. Cancelled late in 1942 to comply with Government requests for reduced war-time travel, the Brier playdowns will be resumed in Saskatoon March 4 to 7, 1946.

MACDONALD BRIER CURLING

HON. THANE A. CAMPBELL, Charlottetown, P.E.I.

Renewing of this famous competition which was cancelled in 1942 to comply with Government request for restricted travelling, means activity for the rink along the right bank or under all sorts of improvised cover.

Wherever you curl it is all good fun, with fine sporting associates. You can use jam palls filled with sand; moulded cement rocks; even blocks of wood instead of regulation stones and have a whole of a time.

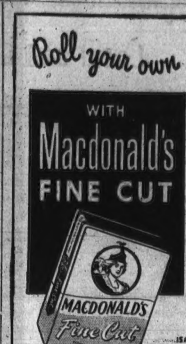

And many a rink trained under these conditions make the big city men go all out to beat them when they meet under ideal conditions, because there is no advantage over a keen eye or strong arm and good judgment, no matter how developed.

Alberta, Saskatchewan and Manitoba all stage big annual competitions, but the most famous and greatest bonspiel in the world is the one staged each year in Winnipeg, curling cradle of the nation. The Manitoba Bonspiel lasts for 12 days, and draws 1,400 curlers from all parts of Canada and the United States.

Major factors in the steady growth of curling, in addition to improvements in curling technique, have been well-organized—and smoothly-functioning provincial and Dominion associations which have done much to standardize the game and foster top-flight competition.

While sectional and provincial competitions have long been in vogue, it is only since 1927 that playdowns have been "back" to determine the Canadian single rink champions. Competent observers state that interest has tripled since inception of the Dominion-wide struggle for supremacy, which has as its goal the Macdonald's Brier Tankard.

The idea for the Canadian playdowns stemmed from the eastern invasion of two Winnipeg rinks in 1925 and 1928, skipped by Danny Howard Wood and George Sherwood, respectively. The westerners displayed a style which had every eastern curler

Cosmic Rays

May Develop More Energy Than Splitting The Atom

A much greater amount of energy than is produced by splitting of the uranium atom may develop from use of cosmic rays, Chancellor Arthur H. Compton of Washington University said. "Experiments have appeared in our study of cosmic rays which transform all of the mass of particle into energy," Dr. Compton told the St. Louis academy of science. Dr. Compton was one of the scientists who developed the atomic bomb.

BATTLEFORD MUSEUM

Will Restore Historic Fortification Of Old Police Post

Construction of a Royal Canadian Mounted Police memorial and Indian museum at Battleford, Sask., is making good progress, according to a progress report issued by Natural Resources Minister J. L. Thompson, honorary president of the committee in charge of the work.

Several buildings on the property have been dismantled and the lumber sold. This revenue will help in restoring the historic portions of the old police post as it existed 75 years ago.

The Commanding Officer's house is nearing completion and with the renovated buildings will serve as the principal home for the police memorial and Indian museum. The historic detention barracks and police barns will be moved within a more convenient radius and a stockade of rustic poplar will be built to accurately reproduce the police post.

In addition to the renovation work, the surrounding grounds will be beautified and the Saskatchewan government has undertaken to make more land available for a community park. Persons who like to donate Indian relics and other historical items to the museum should communicate with Campbell Innes, M.A., North Battleford.

AIR SEA RESCUE SERVICE

During the European war the Air Sea rescue service saved 5,721 aircraft personnel in waters around the United Kingdom, 32,000 allround overseas waters and 4,665 sailors, soldiers and civilians in areas other than the seas around Britain.

RELIEVES MISERIES OF

Baby's Cold

On the Shelves

Penetrates deep into bronchial tubes with its soothing medicinal vapors.

Stimulates the chest and back surfaces like a good, warm blanket.

Warnings, soothing relief—grand relief—comes when you rub good old Vicks VapoRub on the throat, chest and back at bedtime. Its penetrating-stimulating action keeps on working for hours. Invites restful sleep. And often by morning most misery of the cold is gone. No wonder most mothers use VapoRub. Try it tonight—home-proved VICKS VAPORUB

They All Came Back

Another Surprising Case Of The Lucky Thirteen

Culled from an English newspaper in this strange but authentic story of a little village in Somerset named Woolley.

From this tiny hamlet in the lovely countryside near Bath, 13 young men went overseas to fight in the First Great War. And when it was all over they all came back.

Twenty-two years passed, and 13 more lads from Woolley went forth to serve their country in the Second World War. A memorable celebration has just been observed by the village to mark the remarkable fact that these 13 men have also returned home safe and sound—Halifax Herald.

A well founded report says that one well known rank is going to disappear from the Canadian army—that of lance-corporal.

At a meeting held in Calgary last week by the Hard of Hearing Club, J. O. Roberts, formerly of Blaimore, was elected secretary.

A DEDICATION

1946—and Canada is at Peace. In the Maritimes, renowned for its deep sea fishing, fruit and lumber; in the tranquil valleys of Quebec and Ontario; on the rolling plains of the fertile prairies; on the Pacific—in every hamlet, village, town and city across the Dominion, hundreds of thousands of men and women who toiled long and hard during the war years in the cause of Freedom, are returning to their normal, peace-time way of living.

In expressing our gratitude to all those who helped to make victory possible we pay a special tribute to Canada's "unknown" people—the men and women whose names never make the headlines, except at birth and death.

To the ordinary man-in-the-street, the conscientious workman who is a good husband and home provider, and to the industrious housewife, and generous mother, we dedicate this page. For these are the people who form the foundation of solid citizenship, and are basically the strength of our Nation. These are they who abide by the laws of their Government, who pay their bills honorably and confine their pleasures within the bounds of their income.

These are the humble men and women who accept their station in life without envy of others, yet strive constantly to improve their status in order that they and their children may enjoy a better standard of living. Yet they wish never to advance at the expense of others, for they are the kindly simple folk whose only desire is to live in peace and harmony with all men.

These, then, are the unsung heroes—the ordinary folks who enjoy the comforts of the fireside. Their greatest happiness comes from pride of home and family, and the privilege of being able to help others. They attend church, not because they are obliged to do so, but because they appreciate their inherent right to worship God in their own way. They accept the Church as a standard in their relationship with their fellowmen. They adopt the Christian principles as the only true and right way of living, both for themselves and for their children.

Let us, then, give thanks to God for these honest and sincere people—for they are the salt of the earth.—Fred J. White, regional superintendent, Unemployment Insurance Commission.

The 81,000-ton White Star liner Queen Mary has been transformed into a floating nursery for the children of American soldiers who sail soon for the United States with their British war-bride mothers.

THE CHILDREN DON'T BLOW IT

It seems, these days, a couple of snowflakes is enough to set off the "no school" whistle—on the theory, of course, that the children shouldn't be out, little dears. Such a signal is any youngster's delight, for it affords another free day of skiing.

This wasn't the way it was back in the days of the Little Red Schoolhouse. In the first place, no one would ever have thought—even if they had—of blowing a "no school" whistle just because there were a couple of feet of snow in the making.

Youngsters of the Little Red Schoolhouse days had to be rugged. Roads weren't plowed and usually it was the school children who broke them out. The tall ones would go first, breaking a trail for those in the lower grades. Children in the Northern States who lived on the back roads often had the luxury of a closed-in logging sled, pulled by a heavy team of horses. The most complete even had wood stoves in one corner and the boys took turns tending the fire.

Some oldtimers are quick to dub this generation of school children as a bunch of "softies," afraid to go out into a sprinkling of snow. Do these fellows ever stop to think who blows the "no school" whistle? It isn't the children—Christian Science Monitor.

CHRISTMAS SEAL RETURNS TO DATE

\$82,000 has now been received in the 1945-46 Christmas Seal sale, from 51,000 individual contributors. It was announced today by T. L. Ferguson, Lethbridge, president of the Alberta Tuberculosis Association.

Only \$8,000 short of the \$90,000 objective set for this campaign, the present figure is \$26,000 higher than at the same period last year.

"We feel sure there are still thousands of people in Alberta who have intended to send in their contributions," said Mr. Ferguson. "It is so easy to put it off, and then to think it is too late this year. We want to assure everyone that their contributions are still needed to carry on our programme throughout 1946."

Further reminders are being mailed this week to all those who have not yet responded. Mr. Ferguson said. He pointed out that donations sent now can be deducted from 1946 income tax returns. Many people wait until the new year, in order to make their contributions larger. It is expected that the next few weeks will see the realization of the objective.

Local and General Items

Jack Ferguson will leave over the week end to visit his parents at Prince Rupert, B.C.

Nelson juveniles won a 4-3 decision over Coleman on Saturday evening in the first game of their hockey tour.

Among Albertans recently granted naturalization were Louis Cecchini, Blaimore, and Antonio Foch, Burnis.

The Red Trail Motors garage on main street, recently acquired by the Blaimore Motors, is being somewhat remodelled.

Mr. and Mrs. Bert Sena's went to Calgary by Sunday's train, where the latter has since been a hospital patient.

The longest whiskers will win honors at the annual Kemora snow carnival opening on February 14th. We understand that Millar Stewart may compete.

Nominations for councillors, school board members and hospital board members will take place at the town office on Monday next from 11 a.m. till noon.

Two well known local guys on Saturday night last were considering a problem. After a while one expressed his opinion of it, and the other replied: "That's it from a nutshell."

A grand St. Valentine's dance party is to be held at the Lundbreck Community hall on the night of February 15th, under auspices of the Lundbreck Young Peoples Association.

John Brumwell, well known CPR freight conductor, died on Tuesday shortly after being run over in the Macleod yards, necessitating amputation of both legs. He was in his 49th year.

The ship's bell of HMCS Drumheller, corvette named after the city, will be returned to Drumheller and presented to the Sea Cadets and placed on RCSC Furious. A letter will accompany the bell, outlining the history of HMCS Drumheller and its part in action.

This is the ultimate in something or other: Recently the Edmonton Re-establishment Credit office received a very complimentary letter from an Edmonton war widow, thanking the office for the speed with which cheques for her late husband's gratuity had been issued to her; but what caused a little lifting of the eyebrows was Part 2 of the same letter in which the widow also asked about making application for her late husband's re-establishment credit so that she could help set her second husband up in business.—Ex.

NEW LICENSE PLATES READY BY MARCH 20

New motor license plates for the year opening April 1st will be available to the public on March 20th, according to information which the Alberta Motor Association has received from the provincial secretary's department.

The department officials are making arrangements to distribute the plates to various issuing offices in the province well in advance of the date they will be made available.

If the plates are issued at the time stated in March, it is believed that this will avoid a rush on April 1st. Officials pointed out that as gasoline rationing regulations have been abolished by the Dominion government, there will not be the same need of making provision for early issuing of provincial licenses to facilitate the issuing of federal coupon books, as these are no longer needed.

Total number of car licenses issued in the present year which opened on April 1st last is 91,275, compared with 91,500 the year before. Drivers' licenses show an increase from 151,735 to 158,644.

Pia Albino Pessani arrived Saturday from overseas.

Mrs. C. Dalman, of Vancouver, B.C., arrived by TCA last week to visit her son and daughter-in-law, Mr. and Mrs. F. Dalman.

The sermon subject at the United church next Sunday evening will be "His Message." The senior choir will be in attendance. You are cordially invited to be present.

Mr. and Mrs. Victor Law and young son arrived the early part of the week from Crossfield on a visit to Mr. and Mrs. W. J. Bartlett. Victor but recently returned from overseas service.

And there was a little Blaimore boy who had prayed for a baby sister. Then one night recently he added this: "And please, if you have a baby about finished, don't put in any adenoids, tonsils, appendices 'cause they cut 'em out anyway."

Some four hundred gallons of milk had to be dumped into the snow near Cochrane, Alberta, in a few days because all the roads leading to the Calgary market were plugged with snow; and many school children were unable to reach their schools for close on six weeks.

VOCATIONAL TRAINING ADVISORY COUNCIL MEETS

Addressing the opening session of the Vocational Training Advisory Council in Ottawa, Arthur MacNamera, deputy minister of labor, warned vocational training authorities that present facilities would have to be expanded rapidly to take care of the industrial training phases of Canada's reconstruction period during the next several months. Mr. MacNamera pointed out that the capacity of vocational training facilities stands at about 2,000 and that enrolments are now close to that number. With an estimated 300,000 persons to be changing their employment through demobilization from the Forces and closing war industries in the next few months, and a large percentage of these applying for vocational training, the indications are that the existing facilities would not be adequate.

The labor deputy told the meeting that the Hon. Humphrey Mitchell, minister of labor, is much impressed with their work, and that the Dominion labor department proposes to continue its full support of the vocational training program.

15,000 WOODWORKERS STILL NEEDED IN CANADA

The Hon. Humphrey Mitchell, minister of labor, in a statement says that 15,000 additional workers are still needed for jobs in the Canadian woods.

Advance reports on this season's operations indicate that production of logs for lumber and for pulp is over that of last year, but the minister pointed out, in view of the large domestic and overseas requirements, there is need for as large an output as possible.

Due to the shortness of the remaining season, it is important that all camps be filled as soon as possible.

Although experienced workers are most in demand there are opportunities for any physically fit men who have suitable clothing. There is still time before spring for a man to make a good stake.

Mr. Mitchell pointed out that some transportation assistance will be given in some areas as an encouragement to men to accept woods work.

He stated that while the requirements for woodmen are greatest in Quebec, there are considerable vacancies in Ontario, New Brunswick and Alberta. The demand is lighter in British Columbia and the prairie provinces.

Elk herds in Southwestern Alberta are becoming so numerous that they are threatening the crops and haystacks of ranchers.

The famed schooner Bluebonnet, once a crack Canadian racing vessel, has been lost off the coast of Haida. Her crew of eight was rescued.

CARS WILL LAST TWICE AS LONG

That is another thing that good roads in Alberta will do for motorists. Good roads will extend the life of our cars and trucks, cut down expense bills, and contribute enormously to motoring, safety and pleasure.

These are things to think about in considering an improved road system, besides the tourist trade that it will bring, and the encouragement it will give to business within the province.

Good roads will benefit every resident of this province. It is to your advantage to press for a road building program, by talking about it, by urging any group to which you belong to send a resolution to the provincial government, and by asking your provincial member to vote for such a program. We need action, now.

If you are a car owner, you can add your voice to the campaign of the Alberta Motor Association by becoming a member. You will find the many services provided by A.M.A. membership far outweigh the modest fee of \$10 a year. Get in touch with your nearest A.M.A. office—in Calgary, Edmonton or Lethbridge—for full information.

Notice is given in the latest issue of the Canada Gazette of the cancellation under the War Charities Act of La Caisse du Comité National de France Combattante, Section de Blaimore, of Blaimore, through the organization's charter having expired.

PEOPLE ARE SAYING that Maxwell House Coffee is extra delicious. It's true... because Maxwell House is "Radiant-Roasted" to capture the full goodness of its supremely fine blend!

Streamline Your Personal Finances

STOP WORRYING over nagging debts. Put your personal finances on a business-like basis. Consolidate! Borrow enough from the Royal Bank to pay off outstanding bills. Repay the bank by convenient instalments. It will give you peace of mind—and the cost is surprisingly low. On a \$100 loan repayable in 12 monthly instalments the bank charge is only \$3.25.

When you Borrow	You repay for each month	Monthly payments include interest
\$25	6 months \$4.25	2.18
50	6 months 8.48	4.30
75	6 months 12.68	6.43
100	6 months 16.86	8.56
125	6 months 21.03	10.69
150	6 months 25.21	12.82
175	6 months 29.38	14.95
200	6 months 33.56	17.08
225	6 months 37.73	19.21
250	6 months 41.90	21.34
275	6 months 46.08	23.47
300	6 months 50.25	25.60
